

The Centers for Disease Control and Prevention (CDC) guidelines do not have additional (or revised) recommendations during times of medium COVID-19 community transmission levels. If individuals have been exposed to a positive COVID-19 individual in the past 10 days they should wear a mask around others.

Requirements and Protocols

All staff should ensure that there is a log that collects:

- The individual's first and last name, contact number, and verification that they are not experiencing any COVID-19 symptoms at this time.
- Additionally, the individual has not tested positive for COVID-19 in the past 10 days.

In the event there is a change in this guidance due to an increase of COVID-19, the Health Services Department in the Student Services Division will make the recommendation to shift to previous practice.
